Java grammar. (BNF grammar)

Programs

1. <goal> ::= <compilation unit>
2. <compilation unit> ::= <package declaration> <import declarations> <type declarations>

Declarations

3. <package declaration> ::= **package** <package name> **;**
4. <import declarations> ::= <import declaration> | <import declarations> <import declaration>
5. <import declaration> ::= <single type import declaration>
   | <type import on demand declaration>
6. <single type import declaration> ::= **import** <type name> **;**
7. <type import on demand declaration> ::= **import** <package name> **. * ;**
8. <type declarations> ::= <type declaration> | <type declarations> <type declaration>
9. <type declaration> ::= <class declaration> | <interface declaration> | **;**
10. <class declaration> ::= <class modifiers>**class**<identifier> <super> <interfaces> <class body>
11. <class modifiers> ::= <class modifier> | <class modifiers> <class modifier>
12. <class modifier> ::= **public** | **abstract** | **final**
13. <super> ::= **extends** <class type>
14. <interfaces> ::= **implements** <interface type list>
15. <interface type list> ::= <interface type> | <interface type list> **,** <interface type>
16. <class body> ::= **{** <class body declarations> **}**
17. <class body declarations> ::= <class body declaration>
    | <class body declarations> <class body declaration>
18. <class body declaration> ::= <class member declaration>
    | <static initializer> | <constructor declaration>
19. <class member declaration> ::= <field declaration> | <method declaration>
20. <static initializer> ::= **static** <block>
21. <constructor declaration> ::= <constructor modifiers> <constructor declarator>
    <throws> <constructor body>
22. <constructor modifiers> ::= <constructor modifier>
    | <constructor modifiers> <constructor modifier>
23. <constructor modifier> ::= **public** | **protected** | **private**
24. <constructor declarator> ::= <simple type name> **(** <formal parameter list> **)**
25. <formal parameter list> ::= <formal parameter> | <formal parameter list> **,** <formal parameter>
26. <formal parameter> ::= <type> <variable declarator id>
27. <throws> ::= **throws** <class type list>
28. <class type list> ::= <class type> | <class type list> **,** <class type>
29. <constructor body> ::= **{** <explicit constructor invocation> <block statements> **}**
30. <explicit constructor invocation>::= **this (** <argument list> **)** | **super (** <argument list> **)**

31. <field declaration> ::= <field modifiers> <type> <variable declarators> **;**
32. <field modifiers> ::= <field modifier> | <field modifiers> <field modifier>
33. <field modifier> ::= **public** | **protected** | **private** | **static** | **final** | **transient** | **volatile**
34. <variable declarators> ::= <variable declarator> | <variable declarators> **,** <variable declarator>
35. <variable declarator> ::= <variable declarator id>
    | <variable declarator id> **=** <variable initializer>
36. <variable declarator id> ::= <identifier> | <variable declarator id> **[ ]**
37. <variable initializer> ::= <expression> | <array initializer>
38. <method declaration> ::= <method header> <method body>
39. <method header> ::= <method modifiers> <result type> <method declarator> <throws>
40. <result type> ::= <type> | **void**
41. <method modifiers> ::= <method modifier> | <method modifiers> <method modifier>
42. <method modifier> ::= **public** | **protected** | **private** | **static** | **abstract** | **final**
    | **synchronized** | **native**
43. <method declarator> ::= <identifier> **(** <formal parameter list> **)**
44. <method body> ::= <block> | **;**
45. <interface declaration> ::= <interface modifiers> **interface** <identifier>
    <extends interfaces> <interface body>
46. <interface modifiers> ::= <interface modifier>
    | <interface modifiers> <interface modifier>
47. <interface modifier> ::= **public** | **abstract**
48. <extends interfaces> ::= **extends** <interface type> | <extends interfaces> **,** <interface type>
49. <interface body> ::= **{** <interface member declarations> **}**
50. <interface member declarations> ::= <interface member declaration>
    | <interface member declarations> <interface member declaration>
51. <interface member declaration> ::= <constant declaration> | <abstract method declaration>
52. <constant declaration> ::= <constant modifiers> <type> <variable declarator>
53. <constant modifiers> ::= **public** | **static** | **final**
54. <abstract method declaration>::=
    <abstract method modifiers> <result type> <method declarator> <throws> **;**
55. <abstract method modifiers> ::= <abstract method modifier>
    | <abstract method modifiers> <abstract method modifier>
56. <abstract method modifier> ::= **public** | **abstract**
57. <array initializer> ::= **{** <variable initializers> **, }**
58. <variable initializers> ::= <variable initializer> | <variable initializers> **,** <variable initializer>
59. <variable initializer> ::= <expression> | <array initializer>

Types

60. <type> ::= <primitive type> | <reference type>
61. <primitive type> ::= <numeric type> | **boolean**
62. <numeric type> ::= <integral type> | <floating-point type>
63. <integral type> ::= **byte** | **short** | **int** | **long** | **char**
64. <floating-point type> ::= **float** | **double**
65. <reference type> ::= <class or interface type> | <array type>
66. <class or interface type> ::= <class type> | <interface type>
67. <class type> ::= <type name>
68. <interface type> ::= <type name>
69. <array type> ::= <type> **[ ]**

Blocks and Commands

70. <block> ::= **{** <block statements> **}**
71. <block statements> ::= <block statement> | <block statements> <block statement>
72. <block statement> ::= <local variable declaration statement> | <statement>
73. <local variable declaration statement> ::= <local variable declaration> **;**
74. <local variable declaration> ::= <type> <variable declarators>
75. <statement> ::= <statement without trailing substatement>
    | <labeled statement> | <if then statement> | <if then else statement>
    | <while statement> | <for statement>
76. <statement no short if> ::= <statement without trailing substatement>
    | <labeled statement no short if> | <if then else statement no short if>
    | <while statement no short if> | <for statement no short if>
77. <statement without trailing substatement> ::= <block> | <empty statement>
    | <expression statement> | <switch statement> | <do statement>
    | <break statement> | <continue statement> | <return statement>
    | <synchronized statement> | <throws statements> | <try statement>
78. <empty statement> ::= **;**
79. <labeled statement> ::= <identifier> **:** <statement>
80. <labeled statement no short if> ::= <identifier> **:** <statement no short if>
81. <expression statement> ::= <statement expression> **;**
82. <statement expression> ::= <assignment> | <preincrement expression>
    | <postincrement expression> | <predecrement expression>
    | <postdecrement expression> | <method invocation>
    | <class instance creation expression>
83. <if then statement>::= **if (** <expression> **)** <statement>

84. <if then else statement>::= **if (** <expression> **)** <statement no short if> **else** <statement>
85. <if then else statement no short if> ::= **if (** <expression> **)** <statement no short if>
else <statement no short if>
86. <switch statement> ::= **switch (** <expression> **)** <switch block>
87. <switch block> ::= **{** <switch block statement groups> <switch labels> **}**
88. <switch block statement groups> ::= <switch block statement group>
| <switch block statement groups> <switch block statement group>
89. <switch block statement group> ::= <switch labels> <block statements>
90. <switch labels> ::= <switch label> | <switch labels> <switch label>
91. <switch label> ::= **case** <constant expression> **:** | **default :**
92. <while statement> ::= **while (** <expression> **)** <statement>
93. <while statement no short if> ::= **while (** <expression> **)** <statement no short if>
94. <do statement> ::= **do** <statement> **while (** <expression> **) ;**
95. <for statement> ::= **for (** <for init> **;** <expression> **;** <for update> **)** <statement>
96. <for statement no short if> ::= **for (** <for init> **;** <expression> **;** <for update> **)**
<statement no short if>
97. <for init> ::= <statement expression list> | <local variable declaration>
98. <for update> ::= <statement expression list>
99. <statement expression list> ::= <statement expression>
| <statement expression list> **,** <statement expression>
100. <break statement> ::= **break** <identifier> **;**
102. <continue statement> ::= **continue** <identifier> **;**
103. <return statement> ::= **return** <expression> **;**
104. <throws statement> ::= **throw** <expression> **;**
105. <synchronized statement> ::= **synchronized (** <expression> **)** <block>
106. <try statement> ::= **try** <block> <catches> | **try** <block> <catches> <finally>
107. <catches> ::= <catch clause> | <catches> <catch clause>
108. <catch clause> ::= **catch (** <formal parameter> **)** <block>
109. <finally > ::= **finally** <block>

Expressions

110. <constant expression> ::= <expression>
111. <expression> ::= <assignment expression>
112. <assignment expression> ::= <conditional expression> | <assignment>
113. <assignment> ::= <left hand side> <assignment operator> <assignment expression>
114. <left hand side> ::= <expression name> | <field access> | <array access>
115. <assignment operator> ::= **=** | ***=** | **/=** | **%=** | **+=** | **-=** | **<<=** | **>>=** | **>>>=** | **&=** | **^=** | **|=**
116. <conditional expression> ::= <conditional or expression>
| <conditional or expression> <expression> **:** <conditional expression>

117. <conditional or expression> ::= <conditional and expression>
| <conditional or expression> **||** <conditional and expression>
118. <conditional and expression> ::= <inclusive or expression>
| <conditional and expression> **&&** <inclusive or expression>
119. <inclusive or expression> ::= <exclusive or expression>
| <inclusive or expression> **|** <exclusive or expression>
120. <exclusive or expression> ::= <and expression>
| <exclusive or expression> **^** <and expression>
121. <and expression> ::= <equality expression>
| <and expression> **&** <equality expression>
122. <equality expression> ::= <relational expression>
| <equality expression> **==** <relational expression>
| <equality expression> **!=** <relational expression>
123. <relational expression> ::= <shift expression>
| <relational expression> **<**<shift expression>
| <relational expression> **>** <shift expression>
| <relational expression> **<=** <shift expression>
| <relational expression> **>=** <shift expression>
| <relational expression> **instanceof** <reference type>
124. <shift expression> ::= <additive expression>
| <shift expression> **<<** <additive expression>
| <shift expression> **>>** <additive expression>
| <shift expression> **>>>** <additive expression>
125. <additive expression> ::= <multiplicative expression>
| <additive expression> **+** <multiplicative expression>
| <additive expression> **-** <multiplicative expression>
126. <multiplicative expression> ::= <unary expression>
| <multiplicative expression> ***** <unary expression>
| <multiplicative expression> **/** <unary expression>
| <multiplicative expression> **%** <unary expression>
127. <cast expression> ::= **(** <primitive type> **)** <unary expression>
| **(** <reference type> **)** <unary expression not plus minus>
128. <unary expression> ::= <preincrement expression> | <predecrement expression>
| **+** <unary expression> | **-** <unary expression>
| <unary expression not plus minus>
129. <predecrement expression> ::= **--** <unary expression>
130. <preincrement expression> ::= **++** <unary expression>

131. <unary expression not plus minus> ::= <postfix expression> | **~** <unary expression>
| **!** <unary expression> | <cast expression>
132. <postdecrement expression> ::= <postfix expression> **--**
133. <postincrement expression> ::= <postfix expression> **++**
134. <postfix expression> ::= <primary> | <expression name>
| <postincrement expression> | <postdecrement expression>
135. <method invocation> ::= <method name> **(** <argument list> **)**
| <primary> **.** <identifier> **(** <argument list> **)**
| **super .** <identifier> **(** <argument list> **)**
136. <field access> ::= <primary> **.** <identifier> | **super .** <identifier>
137. <primary> ::= <primary no new array> | <array creation expression>
138. <primary no new array> ::= <literal> | **this** | **(** <expression> **)**
| <class instance creation expression> | <field access>
| <method invocation> | <array access>
139. <class instance creation expression> ::= **new** <class type> **(** <argument list> **)**
140. <argument list> ::= <expression> | <argument list> **,** <expression>
141. <array creation expression> ::= **new** <primitive type> <dim exprs> <dims>
| **new** <class or interface type> <dim exprs> <dims>
142. <dim exprs> ::= <dim expr> | <dim exprs> <dim expr>
143. <dim expr> ::= **[** <expression> **]**
144. <dims> ::= **[ ]** | <dims> **[ ]**
145. <array access> ::= <expression name> **[** <expression> **]** | <primary no new array> **[** <expression>**]**

Tokens

146. <package name> ::= <identifier> | <package name> **.** <identifier>
147. <type name> ::= <identifier> | <package name> **.** <identifier>
148. <simple type name>> ::= <identifier>
149. <expression name> ::= <identifier> | <ambiguous name> **.** <identifier>
150. <method name> ::= <identifier> | <ambiguous name>**.** <identifier>
151. <ambiguous name>::= <identifier> | <ambiguous name>**.** <identifier>
152. <literal> ::= <integer literal> | <floating-point literal> | <boolean literal>
| <character literal> | <string literal> | <null literal>
153. <integer literal> ::= <decimal integer literal> | <hex integer literal> | <octal integer literal>
154. <decimal integer literal> ::= <decimal numeral> <integer type suffix>
155. <hex integer literal> ::= <hex numeral> <integer type suffix>
156. <octal integer literal> ::= <octal numeral> <integer type suffix>
157. <integer type suffix> ::= `l` | **L**
158. <decimal numeral> ::= 0 | <non zero digit> <digits>

159. <digits> ::= <digit> | <digits> <digit>
160. <digit> ::= 0 | <non zero digit>
161. <non zero digit> ::= 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9
162. <hex numeral> ::= 0 x <hex digit> | 0 X <hex digit> | <hex numeral> <hex digit>
163. <hex digit> :: = 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | a | b | c | d | e | f | A | B | C | D | E | F
164. <octal numeral> ::= 0 <octal digit> | <octal numeral> <octal digit>
165. <octal digit> ::= 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7
166. <floating-point literal> ::= <digits> **.** <digits> <exponent part> <float type suffix>
| **.** <digits> <exponent part> <float type suffix>
| <digits> <exponent part> <float type suffix>
| <digits> <exponent part> <float type suffix>
167. <exponent part> ::= <exponent indicator> <signed integer>
168. <exponent indicator> ::= e | E
169. <signed integer> ::= <sign> <digits>
170. <sign> ::= + | -
171. <float type suffix> ::= f | F | d | D
172. <boolean literal> ::= **true** | **false**
173. <character literal> ::= ' <single character> ' | ' <escape sequence> '
174. <single character> ::= <input character> except ' and \
175. <string literal> ::= " <string characters>"
176. <string characters> ::= <string character> | <string characters> <string character>
177. <string character> ::= <input character> except " and \ | <escape character>
178. <null literal> ::= **null**
179. <keyword> ::=

abstract | boolean | break | byte | case | catch
| char | class | const | continue | default | do
| double | else | extends | final | finally | float
| for | goto | if | implements | import | instanceof
| int | interface | long | native | new | package
| private | protected | public | return | short | static
| super | switch | synchronized | this | throw | throws
| transient | try | void | volatile | while
